

CMH Innovation Intake Process

At Cambridge Memorial Hospital, our Research and Innovation Office plays a pivotal role in supporting the evaluation and implementation of new healthcare innovations. Our team is dedicated to ensuring that novel solutions align with clinical needs, improve patient outcomes, and enhance overall hospital operations.

We provide comprehensive support to innovators by providing market validation support such as:

- **Initial Evaluation:** We support connecting with innovators to assesses and understand the potential benefits and technical feasibility of each innovation and will provide input and feedback to innovators
- **Clinical Validation:** Our team collaborates with clinicians and researchers to pilot-test innovations within our clinical environment, ensuring they meet real-world needs.
- **Integration Support:** We work closely with IT and operations teams to ensure seamless integration into existing hospital systems, minimizing disruptions and maximizing efficiency.
- **Data-Driven Insights:** Leveraging robust data analytics, we provide evidence-based insights that help validate the efficacy and value of new technologies.
- **Regulatory Compliance:** Our expertise in healthcare regulations ensures that innovations meet all necessary standards for patient safety and data security.

If you are interested in connecting with our Research and Innovation Office for a 1-hour initial assessment, please complete our intake form linked below, and we will follow-up with an available timeslot.
