

Women and Children's Program Information for the Outpatient Clinic Visitors

Important information:

- Everyone is screened prior to entering the hospital regarding symptoms, and contact within your home and community. If a patient or guardian does not pass screening, further discussion regarding their ability to attend their appointment must be had with management and Infection Prevention and Control prior to their entry to the hospital.
- Even if you come with your own mask, you will be asked to remove it and replace with a clean one provided upon arrival by our screening team. We have clean paper bags for the storage and protection of your mask.
- Patients and support people must wear their hospital-issued mask at all times while in hospital. Children under the age of 2 years will not be expected to wear a mask.
- We ask that everyone who attends the clinics be respectful of PPE requirements and physical distancing whenever possible.

Bili Clinic

- **One (1)** support person may come to the Bili clinic with the baby.
- A car seat/stroller travel system is recommended to bring baby to the clinic. If you do not have a travel system, notify the screener at the entrance to the hospital to get assistance, if required.
- If you are the support person and are bringing your baby to the Bili Clinic, please bring information on how often the baby is feeding and how many pees and poos the baby has had in the last 24 hours. Please know your clinic visit may take up to 2 hours to complete. Be prepared to feed the baby while you are here.

Rhogam and Venofer Clinics

- We do not allow visitors for the Venofer or Rhogam appointments, unless the patient is a minor (less than 18 years of age), then they are allowed **one (1)** support person to accompany them to their appointments.

Any questions or concerns regarding this guideline can be brought to the attention of the charge nurse for consideration

Thank you for helping us keep everyone safe
